

2025 Comprehensive List of Covered Drugs

PLEASE READ: THIS DOCUMENT HAS INFORMATION ABOUT THE DRUGS WE COVER IN THIS PLAN.

Members must use network pharmacies to get their prescription drugs. Your benefits, drug list, pharmacy network, premium and/or copayments/coinsurance may sometimes change.

What is the Network Health Comprehensive Drug List?

A comprehensive drug list is a list of drugs that are covered by your plan. Network Health works with a team of health care providers to choose drugs that provide quality treatment. Network Health covers drugs on our comprehensive drug list, as long as:

- The drug is medically necessary.
- The prescription is filled at a Network Health network pharmacy.
- Other plan rules are followed.

For more information on how to fill your prescriptions, please review your plan document or other plan materials.

Are all drugs covered by my benefit plan included on this Comprehensive Drug List?

Yes. This comprehensive drug list is a list of drugs specifically covered by your plan. If you have questions about a medication that is not on the comprehensive drug list, please call member experience at 800-340-1305, 24 hours a day, seven days a week. TTY/TDD users, please call 800-759-1089.

Can the Comprehensive Drug List change?

The drug list may change from time to time as described in the plan document or other plan materials. The enclosed comprehensive drug list is up to date as of 3/1/2025. To get updated information about the drugs covered by Network Health, please visit https://www.networkhealth.com/_assets/pdf/pharmacy-drug-lists/2025individualdruglist5tier.pdf or call member experience at 800-340-1305, 24 hours a day, seven days a week.

What else could result in changes to the covered drug list?

We remove drugs from our drug list right away and will let members know when:

- The U.S. Food and Drug Administration (FDA) decides that a drug is unsafe.
- The drug maker removes the drug from the market.

How do I use the Comprehensive Drug List?

To find your drug on the comprehensive drug list follow the instructions below.

You can look for your drug in the Index that starts on page 76. The Index is an alphabetical list of all the drugs in this document. Both brand-name drugs and generic drugs are in the Index.

- Look in the Index and find your drug.
- Next to your drug, see the page number where you can find coverage information.
- Turn to the page listed in the Index and find the name of your drug in the first column of the list.

What are generic drugs?

Network Health covers both brand-name drugs and generic drugs. A generic drug is approved by the FDA as having the same active ingredient as the brand-name drug. Generic drugs usually cost less than brand-name drugs but provide the same quality of treatment.

If the practitioner indicates “Dispense As Written,” or if the member requests the brand name product for a medication where a generic is available, the member must pay the applicable brand copayment/coinsurance plus the ancillary charge. The ancillary charge is the cost difference between the brand name product and the generic product. When a generic substitution conflicts with state regulations or restrictions, the pharmacist must gain approval from the prescriber to use the generic equivalent.

Are there any restrictions on my coverage?

Some covered drugs may have more requirements or limits on coverage. These requirements and limits may include the following.

- **Prior Authorization:** Network Health needs you (or your prescriber) to get prior approval or authorization for certain drugs. This means that you need to get approval from Network Health before you fill your prescriptions. If you don't get approval, Network Health may not cover the drug.
- **Quantity Limits:** For certain drugs, Network Health limits the amount of the drug that it will cover. For example, Network Health allows 9 tablets per prescription for Sumatriptan tablets.
- **Fill Limits:** For certain drugs, Network Health limits the number of fills that it will cover for a drug. For example, Network Health allows 2 treatment cycles of Varenicline in a 365 day period.
- **Step Therapy:** Network Health needs you to try certain drugs as the first step to treat your medical condition before covering another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, Network Health may not cover Drug B unless you try Drug A first. If Drug A does not work for you, Network Health will then cover Drug B.

You can find out if your drug has any special requirements or limits by looking on the comprehensive drug list that starts on page 3 after this preface. You can also get more information about the restrictions for

specific covered drugs by visiting <https://www.networkhealth.com/assets/pdf/pharmacy-drug-lists/2025individualdruglist5tier.pdf>.

You can ask Network Health to make an exception to these restrictions or limits. See the section, “What if my drug is not on the Comprehensive Drug List?” on page III (3).

Does the Plan cover prescription drugs that are considered “Preventive Services” under the Affordable Care Act?

The U.S. Department of Health and Human Services (HHS) has adopted Guidelines for Preventive Services under the Affordable Care Act (ACA). Under the ACA, some pharmacy benefit plans may provide a range of preventive services for \$0 member cost share and are designated as tier 0 on this document. These items may include:

- Aspirin to Prevent Preeclampsia
- Fluoride Supplementation in Children
- Folic Acid Supplementation for Members Expecting or Planning to be Pregnant
- Tobacco Use Counseling and Cessation Intervention
- Immunizations
- Women’s Health Preventive Services (i.e., birth control, emergency contraception)
- Low Dosed Statin Medications to Prevent Cardiovascular Disease and Stroke (age restrictions apply) (designated at either tier 0 or tier 1 in this document)

A list of the preventive services covered under the plan is available on the member portal at login.networkhealth.com, or will be mailed to you upon request. You may request the list by calling the Network Health member experience number on your identification card.

What if my drug is not on the Comprehensive Drug List?

If your drug is not on this drug list, call customer service to confirm that your drug is not covered. If you learn that Network Health does not cover your drug, you have two choices:

- Ask customer service for a list of similar drugs that are covered by Network Health. When you get the list, show it to your doctor and ask him or her to prescribe a similar drug that is covered by Network Health. Similar drugs that are preferred and covered by your plan’s formulary may be easier to obtain and lower cost to you than non-preferred drugs.
- Ask Network Health to make an exception and cover your drug. Exception requests may include:
 - You can ask us to cover your drug, even if it is not on our drug list.
 - You can ask us to remove coverage restrictions or limits on your drug. For example, for certain drugs, Network Health limits the amount of the drug that we will cover. If your drug has this quantity limit, you can ask us to remove the limit and cover more.

Generally, Network Health will only approve your request for an exception if the preferred drugs included on the plan’s drug list are not as effective in treating your condition or cause you to have adverse medical effects.

How do I find out if my exception is granted?

When you ask for a drug exception, please send a statement from your prescriber that supports your request.

- For drug exception requests received pre-service we will make our decision within fifteen business days of receipt of the information necessary to make a decision.
- You can ask for an expedited (fast) pre-service drug exception if you or your prescriber believes that your health could be seriously harmed by waiting up to fifteen business days for a decision.
- If your pre-service drug exception expedited (fast) request is granted, we will give you a decision no later than 72 hours after we get your prescriber's supporting statement.

For more information

For more information about your Network Health prescription drug coverage, please view your policy.

Network Health's Comprehensive Drug List

The drug list gives coverage information for all drugs covered by Network Health. If you have trouble finding your drug on the list, turn to the Index that starts on page 76.

The first column of the chart lists the drug name. Brand-name drugs are capitalized (e.g., ELIQUIS). Generic drugs are listed in lower-case italics (e.g., *atorvastatin*).

The information in the Requirements/Limits column tells you if Network Health has any special requirements for coverage of your drug.

Tier Name	Tier Definition
Tier 0	Preventive Prescription Drugs
Tier 1	Generic Prescription Drugs and Adherence Generics* (limited to certain conditions)
Tier 2	Preferred Prescription Drugs
Tier 3	Non-Preferred Prescription Drugs
Tier 4	Preferred Specialty Prescription Drugs
Tier 5	Non-Preferred Specialty Prescription Drugs

*Adherence Generics are designated in the comprehensive drug list with the label \$0 and are available at no cost, subject to applicable deductible.

List of Abbreviations

\$0: Adherence Generics

ACA: Affordable Care Act.

LA: Limited Availability. This prescription may be available only at certain pharmacies. For more information, please call Customer Service.

OTC: Over the Counter. An OTC drug is a non-prescription drug.

PA: Prior Authorization. The Plan requires you or your physician to get prior authorization for certain drugs. This means that you will need to get approval before you fill your prescriptions. If you don't get approval, we may not cover the drug.

QL: Quantity Limit. For certain drugs, the Plan limits the amount of the drug that we will cover.

ST: Step Therapy. In some cases, the Plan requires you to first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, we may not cover Drug B unless you try Drug A first. If Drug A does not work for you, we will then cover Drug B.
